

WEHUBIT

Project name
RESOLAB

Country
Burkina-Faso

Implemented by

Budget
350,000 €

Duration
06/2020 – 03/2023

Contribution to SDGs

Implemented by

Financed by

CHALLENGES

The RESOLAB project builds on the organisation's (Terre des Hommes - Lausanne) consolidated experience in promoting the digital inclusion of vulnerable youth and children, based on a contextual analysis of the problems of child and youth workers in gold panning sites in the province of Ganzourgou, in central Burkina Faso.

Within the specific country and intervention context, the project wishes to address the significant education, training and employment needs of children and young people and to reduce the vulnerability of many of them who are turning to the rapidly expanding traditional gold panning industry.

DIGITAL SOCIAL INNOVATION

The project has integrated a solutions approach based on the «9 Principles for Digital Development», continuous adaptation to the context, co-construction and skills development through digital resources.

Particular emphasis is placed on the 'fablab', which is intended to be a community and innovation platform for using digital skills to boost the literacy and employability of young people

A Cyber Café area equipped with computers and Internet connection and an E-learning portal based on an LMS (Learning Management System) - which is currently being deployed - were also included in the project.

SUSTAINABILITY OF PROJECTS

Thanks to Wehubit's support, the project contributes to sustainability by consolidating the results of a first experience of Fablab in Mogtédo.

GENDER PROMOTION

RESOLAB stimulates increased participation of disadvantaged girls in digital inclusion activities.

HUM. RIGHTS-BASED APPROACH

The actions of the project contribute to promoting the right of access of children and young people to education, information and training.

EXPECTED ACHIEVEMENTS

The project offers several perspectives, ranging from possibilities of digital immersion in buoyant sectors, to computer initiations and training, coaching in entrepreneurship, awareness raising and psycho-social activities, online and face-to-face literacy, internet access and networking.

680 YOUTHS TO HAVE ACCESS TO EDUCATION, INFO AND TRAINING

1,370 YOUTHS WILL HAVE BETTER ACCESS TO LIVELIHOOD OPPORTUNITIES

LESSONS LEARNED

- 1)The strengthening of the synergy of intervention with other Terre des Hommes projects implemented in the area, is proving to be a real accelerator of the project's impact and sustainability.
- 2)An important challenge is the translation of acquired skills and competences into incubating innovative entrepreneurship.
- 3)Gamification elements are proving to really enhance the ability of the targeted children and youth to increase their digital skills.
