Call for proposals on eHealth (1st round)
Appel à propositions relatif à l'eSanté (1^{er} tour)

BEL1707111-AP-03

Contracting authority: Enabel, the Belgian development agency
Autorité contractante : Enbel, Agence belge de développement

wehubit@enabel.be

www.wehubit.be

Pour le français, voir ci-dessous

In accordance with the guidelines of this call for proposals on eHealth (point 2.2.3), applicants may send their questions by e-mail to wehubit@enabel.be, at the latest 21 days before the applications submission deadline (see table). The Wehubit Programme will not be obliged to provide clarification on questions received after this date.

Questions will be answered at the latest 11 days before the applications submission deadline. Only answers to questions and other important information not included in the guidelines or FAQ will be published. As such, regular consultation of this website is recommended in order to be informed of the questions and answers published. **If possible, we will update this file weekly. Questions and answers will only be published in the language in which they were received.**

We remind you [our website](#) where you can download the 2 documents (Guidelines and Introductory Note).

	Date	Heure/Hour
Date limite d'envoi des questions Deadline for submitting questions	15/06/2019	17:00
Date limite réponses aux questions Deadline date for responding to questions	25/06/2019	17:00
Date limite de soumission des demandes de subsidie Deadline for submitting Grant applications	05/07/2019	13:00

Conformément aux lignes directrices de cet appel à propositions relatif à l'eSanté (point 2.2.3), les demandeurs peuvent envoyer leurs questions, par courrier électronique à wehubit@enabel.be, au plus tard 21 jours avant la date limite de soumission des demandes de subsidie (voir tableau). Le Programme Wehubit n'a pas l'obligation de fournir des éclaircissements sur des questions reçues après cette date.

Il y sera répondu au plus tard 11 jours avant la date limite de soumission des demandes. Seules les réponses aux questions ainsi que d'autres informations importantes ne figurant pas dans les FAQ ou dans les lignes directrices seront publiées. Il est par conséquent recommandé de consulter régulièrement ce document afin d'être tenu informé des questions et réponses publiées. **Dans la mesure du possible, nous mettrons ce document à jour chaque semaine. Les questions et réponses ne seront publiées que dans la langue dans laquelle elles ont été reçues.**

Answers to questions received between 20th & 24th of May 2019

Question 1

Could you please clarify if the 10% co-funding can be brought by other institutional donors? Or does it have to be own funds?

Answer:

In the absence of details in the guidelines regarding the expected co-funding, your organization may define the origin of the funds itself. However, if the action is part of a wider program, this should be mentioned in the application form. In case of co-funding with another donor, while presenting your detailed budget during the second round, it must be clear who is funding what, and how the financial control can confirm this distribution of funding, and avoid double funding.

Question 2

What do you define as “reaching a business case”? Does it simply mean that there needs to be a developed business plan on paper only, or does it already need to have been tried and tested?

Answer:

To us it means that after having gone through the prototyping, the testing and the piloting stages, you have implemented a digital solution/service and you have now a clear understanding of its functioning in its environment, its users, its functionalities, its strengths, its weaknesses, you are able to provide some very concrete and detailed user cases, and you have a plan to sustain it. Your digital solution or service is already implemented (production/live) and is ready for being scaled-up and/or replicated.

Question 3

If an empirical case needs to be made for financial viability, is revenue generation enough to say that there is a business case or is actual financial sustainability (i.e. break-even) the criterion?

Answer:

We don't request a plan proving financial sustainability, but rather the elements described under the first question. However sustainability (institutional and financial) is key in the assessment.

Question 4

Does the applying organization need to be the one that has the actual business case, or can the model of an associated organization serve as proof of a solid case? In our example, the American Red Cross (who will not be involved in this proposal) has established financially sustainable First Aid Blended Learning in their own country. Could this serve as sufficient evidence for the jury that First Aid Blended Learning works and is financially viable, so that we can also roll it out in one of the aforementioned countries?

Answer:

Again, our point is to fund scaling-up/replication of already implemented solutions by the applicant. Also we don't fund earlier stages of development/testing/piloting. It is recommended to demonstrate in concrete terms how your solution is already being implemented and used (you may send URL's of video,

articles, screenshots, etc.) Organisations need to convince the jury why Wehubit should invest in their digital solution/service rather than in the others. This is a highly competitive fund. At the organisation level, we only request the proof of having the capacity to manage a grant of public money. See guidelines for more detailed information.

If you're not eligible as applicant, I would recommend you to check if you are eligible as co-applicant.

Question 5

Notre ONG a développé une application E-santé relative à l'information des personnes vivant avec le VIH dans des pays hors appel à projet – Egypte, Liban et Tunisie – que nous aimerions désormais répliquer dans des pays ciblés par le présent appel à projet. Cette réplification est-elle éligible ?

Réponse :

Le fait que votre solution ait été implémentée par le passé dans un pays non-partenaire de la coopération belge ne la rend pas inéligible, pour autant que votre organisation et votre projet répondent bien aux critères d'éligibilité mentionnés dans les lignes directrices.

Question 6

XXX is a limited company headquartered in Nairobi, Kenya. According to the calls to proposal guidelines you provided, Kenya is not listed under countries of Belgian Bilateral Development Cooperation. The complete list of questions we would like clarifications on from you, are listed below;

- **Is xxxx eligible to bid the eHealth Proposal?**
- **What kind of system are you looking for? is it web-based or on-premise?**
- **What is the overall architecture of the existing system?**
- **If the current system architecture is hosted on-premise, Do you currently have servers? if so, what kind?**
- **if the current system architecture is hosted online, Would you need integration with existing systems or you prefer it to be autonomous?**
- **What kind of database server is used to hold information? Is it MySQL or Microsoft SQL server**
- **The answers to these questions should give EITI Africa a clear understanding of the appropriate action to take. If you have any questions or comments, please feel free to reply to this email.**

Answer:

Eligibility criteria of your organisation and project are defined in the guidelines of the call. Please refer to the guidelines. However visiting your website, and reading your questions, I have the impression you are a consultancy firm, looking for procurements as service provider. Wehubit does not launch procurement through its website but uses Enabel's procurement system.

Answers to questions received between 27th of May and 07th of June 2019

Question 7 Co-funding rules

**We just went through the guidelines of eHealth call for proposal and are interested to submit a project !
Could you please clarify if the 10% co-funding can be brought by other institutional donors? Or does it have to be own funds?**

Answer:

In the absence of details in the guidelines regarding the expected co-funding, your organization may define the origin of the funds itself. However, if the action is part of a wider program, this should be mentioned in the application form. In case of co-funding with another donor, while presenting your detailed budget during the second round, it must be clear who is funding what, and how the financial control can confirm this distribution of funding, and avoid double funding.

Question 8

We were interested in applying to the call for E-health. Could it be possible to talk to you in order to have more information about conditions etc?

Answer:

In order to ensure equal and fair treatment between all applicants, please refer to the guidelines of the call for proposals for its conditions. We will answer to precise questions in case their answer is not available in the guidelines.

Question 9

As it concerns scale-up initiatives, may I submit initiatives that already exist but can be further scaled up by means of digitisation? Or should the initiatives have a digital component right from the start?

Answer:

To us it means that after having gone through the prototyping, the testing and the piloting stages, you have implemented a digital solution/service and you have now a clear understanding of its functioning in its environment, its users, its functionalities, its strengths, its weaknesses, you are able to provide some very concrete and detailed user cases, and you have a plan to sustain it. Your digital solution or service is already implemented (production/live) and is ready for being scaled-up and/or replicated.

Question 10

En lisant les conditions d'éligibilité, je souhaiterais savoir si les organisations internationales comme OIM sont également éligibles pour demander du financement. (i.e, applicant ou co-applicant).

Réponse :

Le fait d'être une organisation internationale ne vous rend pas inéligible. Concernant les critères d'éligibilité, merci de vous référer aux lignes directrices.

Question 11

J'aurais voulu savoir si les agences étatiques peuvent postuler directement ou si elles doivent s'allier à une autre organisation (ONG, entreprise sociale, Nations Unies)?

Est-ce que les agences des Nations Unies (Unicef, FNUAP) peuvent également postuler ?

Réponse :

Nous confirmons qu'une entité publique est éligible sans aucune obligation de se mettre en consortium avec une ONG. Les agences des Nations Unies sont également éligibles.

Question 12

Ci-dessous trois questions relatives à l'appel E-Santé ouvert par WeHubit :

1. Le scaling-up peut signifier plusieurs choses?

- **multiplier les sites ou zones d'utilisation du service = oui**
- **augmenter le nombre d'utilisateurs ou de bénéficiaires = oui**
- **influencer les réglementations ou normes générales à partir de la niche dans laquelle fonctionne la solution = oui/non, cela sera positivement ou pas évalué dans les questions (13, 15, 21 et 26) du formulaire de demande.**
- **augmenter le nombre de fonctionnalités de la solution existante = oui**

2. Imaginons qu'un acteur privé veuille apporter dans le projet un développeur à mi-temps, en tant que Corporate Social Responsibility.

- **Doit-on quand même procéder à un appel d'offre? = non**
- **Est-il associé ou fournisseur? = Cette personne sera associé.**
- **Et dans le cas d'un associé, la valeur du temps de travail de ce développeur est considérée comme "en nature" et donc inéligible pour les 10% de contribution? = oui, c'est bien correct.**

3. Est-il possible d'être (co-)demandeur dans un projet et associé dans un deuxième? = oui c'est tout à fait possible

Question 13

We are interested in understanding our eligibility in the associate capacity to one of our NGO partners. The NGO partner in partnership with our organization has built and scaled a digital health solution in one country and has piloted it in a neighbouring country on Enabel eligibility list. We are looking to scale that digital innovation.

In the capacity of associate, we intend to provide specialized technical assistance as they scale in the new country. We are a private organization. We would like some clarity on the scope of the Associates role described below:

Other organisations may be associated with the action. Associates actively participate in the action, but cannot be eligible for grants, except for daily allowances and travel expenses. These associates do not need to satisfy the eligibility criteria mentioned in point 2.1.1. The associates must be mentioned in Annexe A.2 - Grant Application file of the 2nd round, entitled 'Associates of the applicant participating in the action'. Including a private sector actor as an associate will be considered as an asset.

Can we qualify to receive funding through this mechanism to support the prime through time based technical assistance?

Answer:

In accordance to Call for Proposals on eHealth (Reference: BEL1707111-AP-03), if you are in the capacity of associate participating in the action, you are not eligible for grants (will not receive funding) except for daily allowances/travel costs.

Answers to questions received between 07th and 27th of June 2019

Question 14

Je vous informe que nous sommes intéressé par votre avis d'appel d'offre. A ce titre nous souhaitons avoir l'ensemble de la documentation. Merci pour votre bonne compréhension

Réponse :

Nous vous renvoyons vers notre [site web pour toutes les informations, lignes directrices et formulaire en ligne](#). Merci de prendre le temps de lire attentivement toutes les explications.

Question 15

I have an enquiry regarding your call for proposals on eHealth; is Zanzibar included within this call, or only mainland Tanzania?

Answer:

Tanzania is one of the 14 partner countries of the Belgian Development Cooperation and Zanzibar is included within this call for Proposals on eHealth.

Question 16

Hello! I am a functionary working in xxx. I recently came across your funding opportunity. Before passing this opportunity along to our country offices, I would like to verify that xx is an eligible organization to apply for your funding. Xx is a public organization but it is not a "national ministry of health." xx has regional offices located in all of the member countries in the Americas.

Answer:

All information regarding the eligibility of your organisation is published in the guidelines of the Call for Proposals on eHealth. To ensure a fair treatment of the questions/answers, we refer you to point 2.1.1 (Eligibility of applicants and co-applicant(s)) of the guidelines (Reference: BEL1707111-AP-03): as explained, a public organisation is a 100% public entity with no private capital.

Question 17

We came across the Digital Health Grant Funding Opportunity. We are a good fit at xx. We provide access to affordable healthcare financing to the uninsured in Uganda. We are now scaling the model in partnership with a telecommunications company to be accessed by over 12 million people utilizing Mobile Money service in Uganda. It's a free service to the target consumers. The only challenge is that xx is a Social Enterprise for continuity and sustainability. You are looking out for NGO and Public Organisations. We would like to know if you would consider Social Enterprises as well for the Grant opening. We look forward to your feedback in this regard.

Answer :

If you are a private enterprise, you need to prove that you are non-profit. This criteria may evolve in future calls for proposals. But under the current call, the elements described in the guidelines are the only one valid.

Question 18

Kindly help us with answers on the following questions related to Reference: BEL1707111-AP-03

- One of the requirements for Round 1 is "Financial statements certified by an independent body (audit or statutory commissioner). Those statements may not be older than 2 years. Public entities and co-applicants are not required to submit an external audit report."
If the applicant is a global organisation, can the financial statements be consolidated ones for the group?
- The introductory note states "The target group of this call for Proposals are non-profit or public organisations that want to diffuse and scale-up or replicate their own digital innovations linked to the subject of this call for Proposals."
Can an applicant apply to scale up the digital tools of a public institution such as the Ministry of Health?
- The guidelines state, "Applicants may not offer to support third parties financially."
Please clarify the differences between a contractor and a third party.

Answers :

Please find hereunder already the answers to your questions :

- Yes
- Yes if it has been involved in the previous phases. It would make sense to have the Ministry as co-applicant.

- “Applicants may not offer to support third parties financially” : by this phrase, it is meant that an applicant can’t give a grant (in order to avoid cascades of grants / sub-grants). Financial transfer can be payments to contractors, after respect of procurement rules and delivery of service/product/goods/equipment, etc.

Question 19

I realize we just missed the deadline for asking questions for the Wehubit Programme, Call for Proposals on eHealth. In the off chance that you're able to still consider questions, please see below a few questions:

- Is it required that the pilot and testing of our technology solution should have occurred in one of the countries of the Belgian bilateral development cooperation?
- I see in the guidelines that "actions consisting primarily in using a proprietary digital solution" are not eligible. Our technology is proprietary but we grant perpetual licenses to our customers should they decide to scale the product. Given this, would we be eligible to apply?

Answers:

The answers to your two questions are :

- it is not required that the pilot and testing have occurred in one of the 14 priority countries of the Belgian development cooperation.
- Eligibility will be checked on the basis of your organisation (required supporting documents) and on the fact that your solution has already been implemented. All other aspects will be assessed by the evaluation committee.

Question 20

Suite à la lecture de votre appel à proposition (e-santé), je voudrais savoir si les entreprises sociales sont éligibles ?

Réponse :

Si vous êtes une organisation de droit privé, vous devez prouver le caractère "sans but lucratif" de votre organisation tel que décrit dans les lignes directrices BEL1707111-AP-03.

Question 21

J'ai déjà fini à remplir le formulaire mais je ne parviens pas à aller vers la page suivante.

Réponse :

Après avoir rempli le formulaire, en bas de page vous trouverez le bouton 'page suivante' comme indiqué sur la capture d'écrans suivante :

Cliquez dessus et vous arriverez sur la page de téléchargement des 4 annexes à joindre à votre candidature.

Question 22

I am emailing on behalf of our team at xxx who are interested in learning more about the Digital Solutions to Achieving Universal Health Coverage Opportunity. In reviewing the published documentation, we noticed the list of annexes. However, we were unable to locate them on the website. Could you please send, or point me toward, the annexes for the Access to Digital Solutions opportunity? I appreciate your time and attention to this request.

Answer :

To access the annexes mentioned in the guidelines, you must have created an account . When logged in, go the 'Grants - Calls for Proposals' section of the 'financing instruments' page and click on the 'apply now' button. You will access the online form and underneath you'll find all annexes requested for the 1st round.

Question 23

Hello, I am reaching out to see if xxx as a multi-lateral institution would be eligible for this grant. It was not entirely clear from the guidelines so I wanted to double check.

Answer:

If xxx is a multi-lateral institution concerned with international public health (a 100% public entity with no private capital), the organisation is eligible for grants.

Question 24

Please help me to create my account and sign in. I have failed to create my account and come to the application. I want to fill the application.

Answer:

To create an account, please read our [FAQ](#) on the website.

WEHUBIT

Question 25

During feeding of data in the online form, I found some error concerning the request cost it says "The value 315.00000 is not allowed for element Amount requested (€) (max 90% of project amount). Please read limits via the ? symbol" I might need the help

Answer:

For the amount requested, the value must be between € 50000 and € 350000. If you want to update your amount, the new amount will be validated when clicking on the 'save as draft' button. Please try again.
